Month: February Year:2022
Mode: Online
Duration: 1 month

About me:

I am Pradyumna Bhat, student of N.M.A.M Institute of Technology, Nitte, Karkala**.** I am currently pursuing Bachelor of Engineering in Electronics and Communication branch (3rd year). I am passionate about technology trends and exploring different programming languages to upskill myself towards industry needs. Internship is an opportunity for me to learn and upskill with the latest technical knowledge used in the industry. The outcome of internship is completion of a project as a proof of my understanding of all the concepts and publish it in GitHub platform

About the company:

DLithe Consultancy Services Private Limited is a Bengaluru based EdTech company, started in the year 2018. It is led by industry professionals with two decades of experience in the field of Information Technology - Product, Project Management, Engineering Excellence and Delivery, Customer Management and Human Resource management areas.

The company provides technology services such as platform migrations, application development and maintenance, product development. The company also provides competency development services to corporate and major academic institutions to build an agile workforce. The company has 20+ technical consultants engaged in technical delivery.

Internship Journey:

The internship was on *Front End Development - HTML, CSS,* . I learnt about Xampp software installation followed by programming using basic concepts of web technology such as HTML, CSS, JavaScript and advanced concepts like creating a table using SQL and storing data(database) in Xampp software. I learnt about importance of JSON, various datatypes and restructuring input data. I worked on a project using Xampp to make a simple interactive webpage using the concepts learnt during the training period of the internship The project can be viewed in the GitHub link provided at the end of this internship report.

Program Summary

- HTML, CSS, JavaScript
- Basics of JSON
- Data transfer between API's, Client and Server
- Restructuring input data from the user
- Syntax and datatypes
- Xampp Installation, Environment Setup
- Fundamentals of React

Thanks to this wonderful internship opportunity, I know Front End Development concepts like HTML, CSS, JavaScript and basics of React concepts. Overall it was good experience to upgrade my technical skills and gave me an opportunity to enhance my frontend skills to prepare myself for industries
